would you hear it
die?**

BERKELEY'S DILEMMA

By: Rodrigo Lopez, David Avalos, Erasmo Medina

Problem Statement

- The growing need for intuitive, responsive web applications that present environmental data in an interactive and engaging manner. Users face challenges in accessing and interpreting dynamic data from various environments.

Proposed Solution

- Berkeley's Dilemma" is a web application designed to address these challenges by: Offering a multi-environment interface that allows users to explore different environmental settings. Interactive design elements such as a custom carousel, timeline, and dynamic UI components. Secure user authentication and email notifications for user engagement. Location-based environmental data visualization using ArcGIS API for an immersive experience.

Evolution of the Solution

Initial Setup:

- Created the project structure with basic frontend (HTML, CSS, Bootstrap)

Feature Development:

- Introduced interactive elements (custom carousel, timeline, sliding bar). Integrated ArcGIS API for environmental data visualization. Implemented secure authentication using bcrypt and Nodemailer for email notifications.
- Backend (Node.js, Express, MongoDB). Focused on responsive UI and foundational features.

Refinement:

- Improved design with modular CSS for easier customization and better maintainability.
- Enhanced the user login system, implemented password hashing, and improved UI logic.
- Pased all our page to react, to optimize our page.

Challenges Faced and Solutions

Challenge 1: Ensuring a smooth, interactive UI experience across different environments.

Challenge 2: Implementing secure user authentication and email notifications.

Challenge 3: Visualizing dynamic environmental data.

Solution: We used **modular CSS** and **Bootstrap** to ensure responsiveness and smooth navigation.

Solution: Integrated **bcrypt** for password hashing and **Nodemailer** with **Google OAuth2** for secure email functionality.

Solution: Utilized **ArcGIS API** for dynamic, location-based environmental data mapping and visualization.

Final product

-
- Successfully created an interactive, secure, and user-friendly web application for visualizing environmental data.

Timeline

-
- We add a game to make more interactive the page. And to see who is the best with the mouse aim
-

Thank you for your commitment!

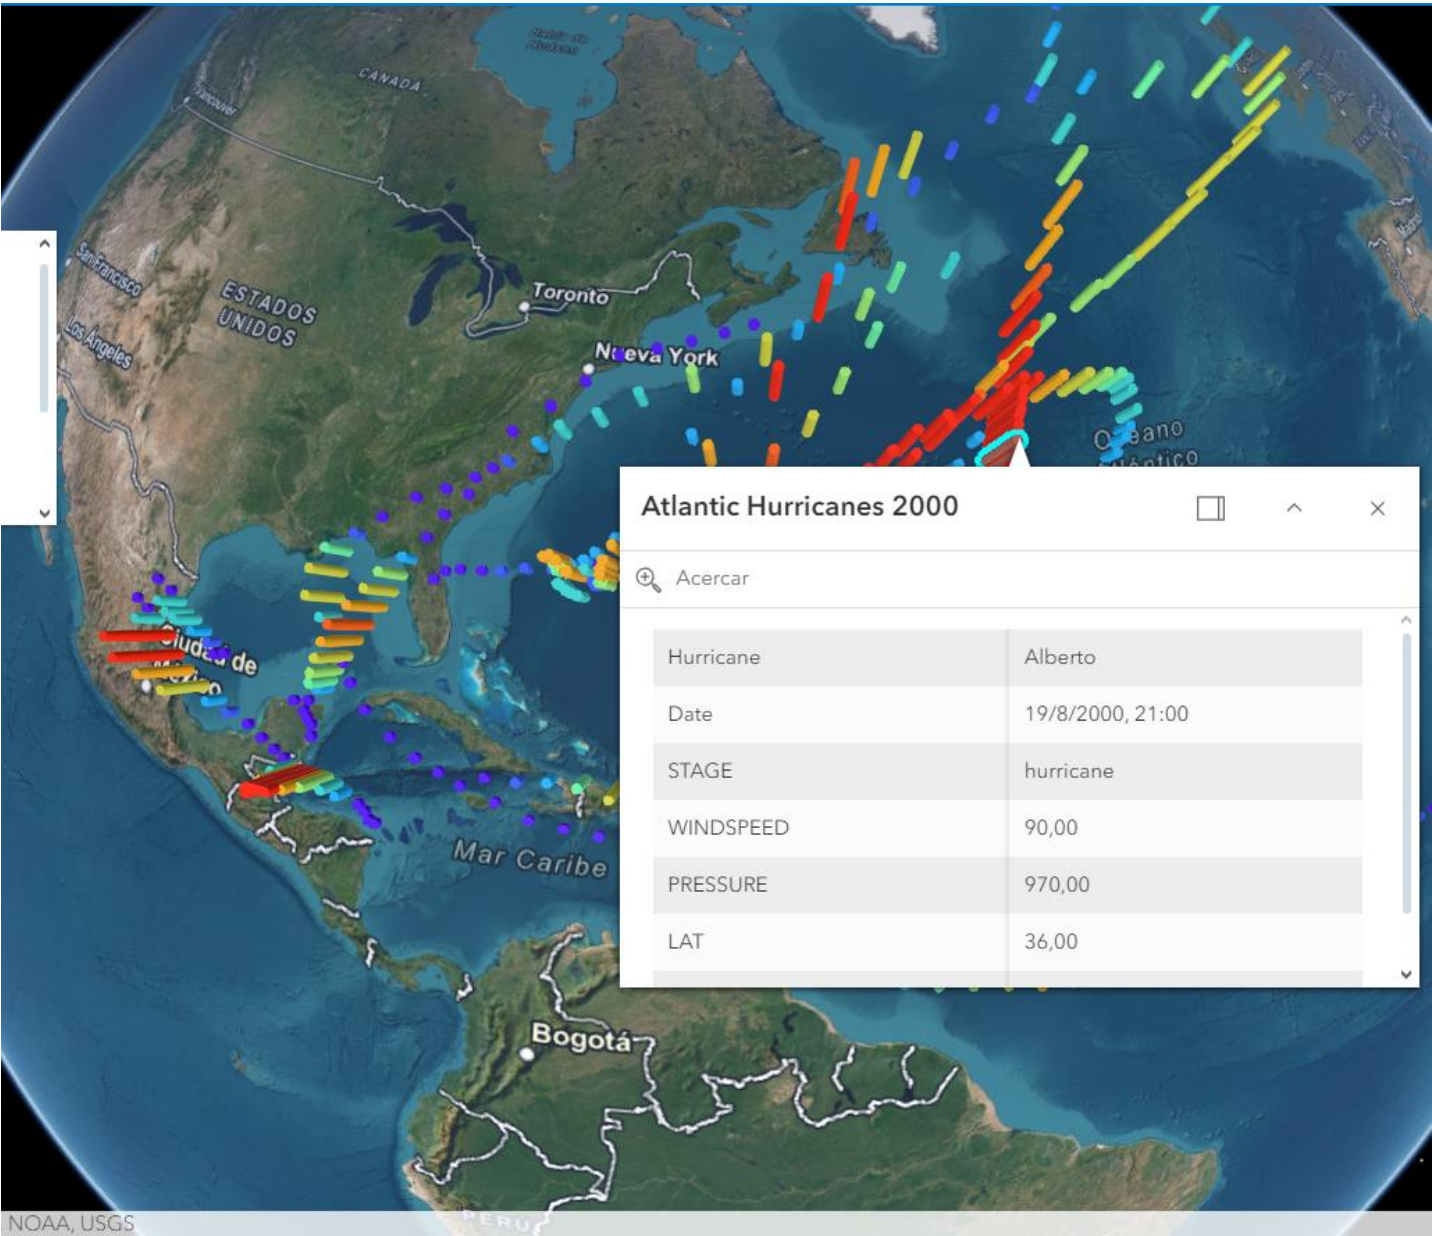

Keep on Killing

Your hypocrisy is burning the planet down, causing hurricanes, death, and extinction. The world suffocates under the weight of your decisions. Every luxury, every convenience, every act of apathy—is fuel to the fire that's reducing our world to ash.

Here are the innocent lives you're wiping out without a second thought:

People would kill a man to take the fat from his corpse and use it to grease their boots."

```
// Google OAuth2 client setup
const oAuth2Client = new google.auth.OAuth2(CLIENT_ID, CLIENT_SECRET, REDIRECT_URI);
oAuth2Client.setCredentials({ refresh_token: REFRESH_TOKEN }); // Set refresh token

// Email sending function
async function sendMail(sendEmail) {
  try {
    console.log("//Attempting to obtain access token...");
    const accessToken = await oAuth2Client.getAccessToken(); // Obtain access token
    console.log("//Access token obtained.");

    const transport = nodemailer.createTransport({
      service: 'gmail', // Use gmail service
      auth: {
        type: 'OAuth2',
        user: EMAIL,
        clientId: CLIENT_ID,
        clientSecret: CLIENT_SECRET,
        refreshToken: REFRESH_TOKEN,
        accessToken: accessToken, // Use access token
      },
      tls: {
        rejectUnauthorized: false // Allow self-signed certificates
      }
    });

    console.log("//Transport created, preparing email options...");
    // Define email options
    const mailOptions = {
      from: 'Berkeley's Dilemma <${EMAIL}>',
      to: sendEmail,
      subject: 'Welcome to Berkeley's Dilemma!',
      text: 'Thank you for signing up!',
      html: `<div style="font-family: Arial, sans-serif; color: #E7E5DF; line-height: 1.6; background-color: #393e41; padding: 20px; text-align: right;"><h1 style="color: #FF7F11; font-size: 2.5em; margin: 0;">Keep on Killing!</h1><h3 style="color: #FF7F11;">Your hypocrisy is burning the planet, causing <strong>hurricanes</strong>, <strong>death</strong>, and <strong>extinction</strong>.</h3><div style="font-size: 1.2em; margin: 20px 0;">Feel the satisfaction? Enjoy watching as the world suffocates under the`
