Reflection

I really liked the class, it's interesting and I would like to study more of this. The topics we covered were really good, the problem was the time, there was not enough time to see all, or almost see all and understand it in the perfection. Exercises were good, only that I think they were repetitive, and it could be in one but real good made it. The course is good and almost perfect because we see everything, but I would like them to divide this class in two semesters it could be better.
